EDUCATION

Northeastern University

Sept. 2025 – Dec. 2026, GPA: 4.0

Master of Science in Computer Science

Boston, MA

- **Coursework:** Algorithms, Programming Design Paradigm, Web Development, Fundamentals of AI

Tufts University

Sept. 2021 – May 2025, GPA: 3.98

BS in Computer Science and Cognitive and Brain Science

Medford, MA

- **Coursework:** Algorithms, Data Structures, Software Engineering, Computation Theory, Human Computer Interaction

SKILLS

Languages : Python, Java, C++, JavaScript (React.js), HTML/CSS, Node.js, SQL, Next.js, Git, Pandas, PowerShell

Engines : Unreal Engine 5, Godot Engine

EXPERIENCE

Sierentz North America LLC

June 2024 – August 2024

Data Analyst Intern

Wilton, CT

- Worked to scrape data, upload it to databases, and manipulate that data into presentable graphs using SQL and Pandas
- Deployed several small scale programs for workplace efficiency using Python such as an OpenAI chatbot and a graph/pdf compiler

Evolv Technologies

June 2023 – August 2023

Cybersecurity/IT Specialist Intern

Waltham, MA

- Worked with the IT and Cybersecurity team to manage Active Directory, learn the basics of PowerShell Scripting, computer hardware repair, and network security
- Learned to handle IT requests from other employees to fix various issues

PROJECTS, GitHub: <https://github.com/sfrancis21>

Google Calendar Implementation, GitHub: [GoogleCalendarProject](#)

- Created an implementation of Google Calendars using Java. The design was based on the MVC model using design patterns such as command and builder. It includes a functioning GUI as well

Goodreads Website, GitHub: [Goodreads-FrontEnd and BackEnd](#)

- Built a full-stack web application that recreates Goodreads.com using Next.js (React) with a Node.js backend using the Google Books API

Unreal Engine Game (In Progress – Self-Directed Project)

- Developing a 2D top-down action and adventure game using Unreal Engine 5, PaperZD, Blueprints, and free art assets
- Implemented core systems such as enemy spawning, menus, melee and projectile damage/attacks, and AI enemies with behavior trees
